

Harbour & Co. order desk

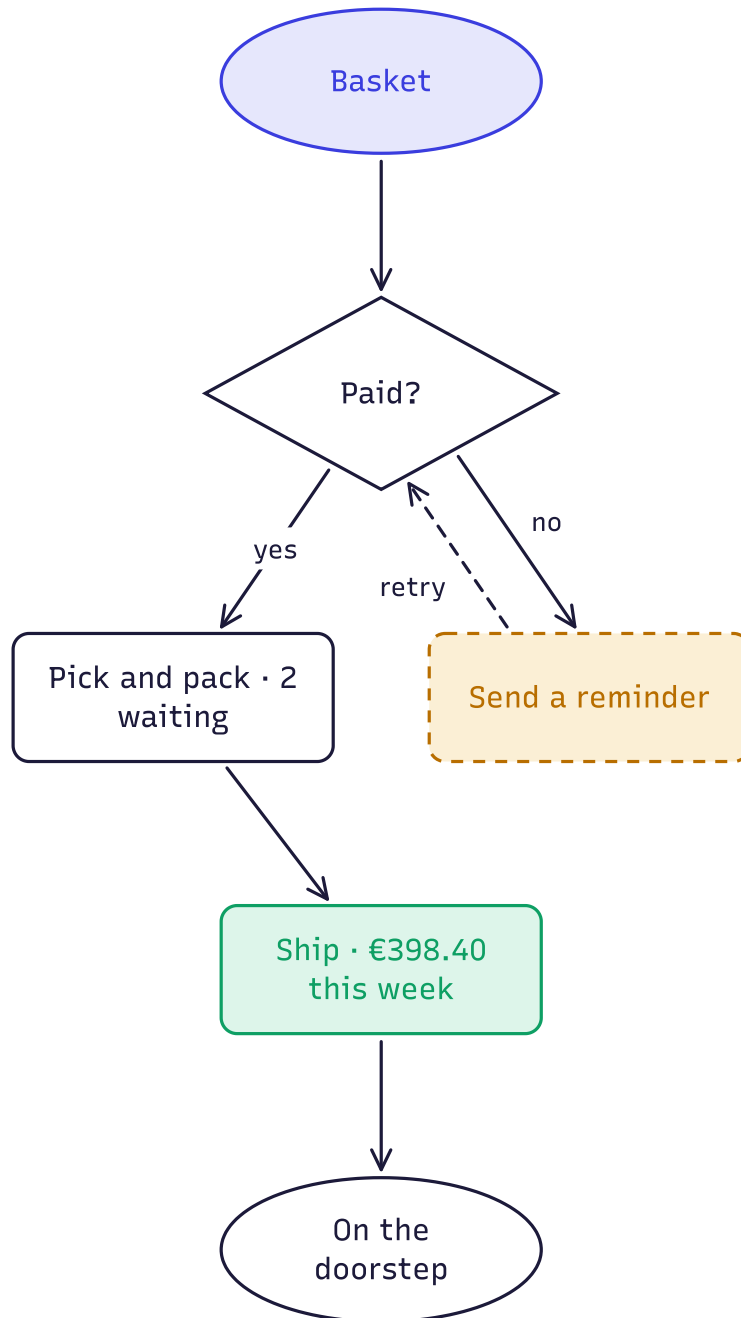

📦 Taken this week

€398.40

▲ 10.7%

How a mug order travels from basket to doorstep, the week's orders, and a form for orders taken by phone.

Flow

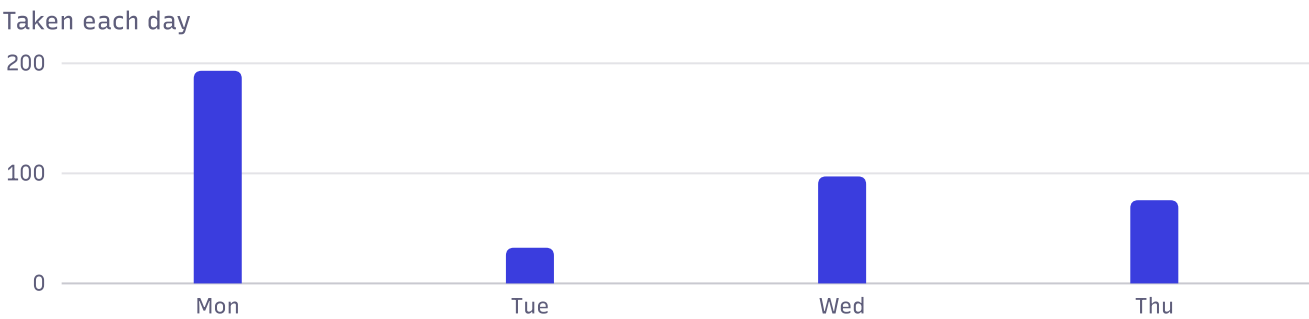

6 steps, joined by 6 arrows. Labels in braces show live numbers.

Orders

This week 5 rows

customer	qty	total	status	day
Mira Patel	2	€52.80	Shipped	Mon
Tom Okafor	6	€140.40	Paid	Mon
Ana Lima	1	€32.40	Waiting	Tue
Jon Berg	4	€97.20	Paid	Wed
Sara Kim	3	€75.60	Shipped	Thu
Total		€398.40		

Phone order

Step 2 of 3

How should it travel?

Questions customers ask

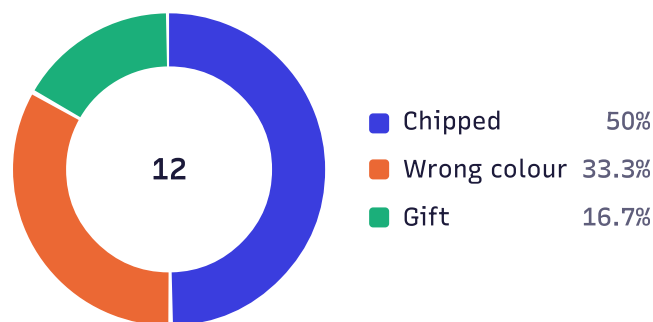

Delivery

3 rows

method	days	price
Standard	2–3	€4.50
Express	1	€9.00
Pick up in the shop	same day	€0.00

Returns

Thirty days, no questions. Why mugs came back this year:

Paying

Cards, bank transfer, or cash when picking up. Invoices go out the day an order ships.

How this document works

The order form's step, the delivery prices and the VAT rate are **data cells**: switch to Edit to see them as small chips at the top. Readers never see them, but **Next** and **Back** change the step with `(set! step (+ step 1))`, and each part of the form is hidden unless the step matches.

The tab that is open is the value of `view`, so the buttons above open a tab with `(set! view "Orders")`. The flowchart is data too: its labels read the orders as they come in.
